

{ esbaby cloth pads }

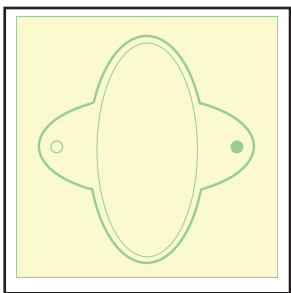

types, sizes & absorbency

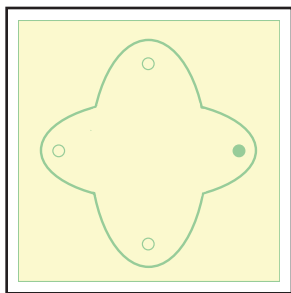

cloth pad

simplify

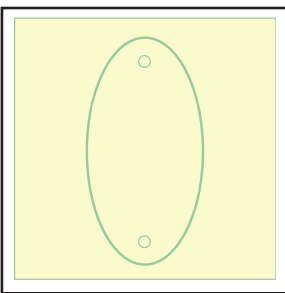

this pad wraps around your underwear and has snaps as closures. when ordering from esbaby, a cotton print is the standard topping. however, for a small fee it can be topped with either microfleece to keep your body dry or velour for softness. it can be lined on the bottom with microfleece as a water-resistant barrier or simply be entirely made of the absorbent fabric of your choice [flannel/sherpa/hemp/bamboo fleece/organic sherpa.]

cloth pad w/holder

cloth pad holder

refill cloth pad

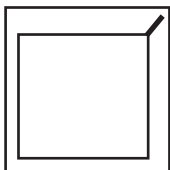

a cloth pad system

this is a cloth pad that is composed of 2 parts. a PUL or microfleece pad holder and an oval shaped cloth pad. this cloth pad snaps in and out of the pad holder, which is completely waterproof with PUL, or water-resistant with microfleece. this is the most economical solution as pad refills are less expensive than entire cloth pads. refills snap out when dirty, and clean ones are snapped in.

washing instructions

some people like to soak their cloth pads in cold, to help prevent stains. cloth pads can be washed with regular laundry or diaper laundry. do not use fabric softeners. dry in dryer or line dry.

accessories

wetbag

used for carrying dirty diapers on road trips, or for storing diapers until laundry day

8" - mini

10" - regular

12" - overnight

14" - super/postpartum
